

Islands

design Stephen Burks

Open container accessible around the entire perimeter thanks to a series of pivoting slats.

Top and bottom in 19mm thick, contoured and with bevelled MDF, with the bottom part always lacquered with epoxy powder coating matt black, and top available veneered in Canaletto walnut "rigatino", charcoal dyed oak or Stone Oak ®, with bevelled edge always lacquered with epoxy powder coating matt black, or all matt black lacquered.

Slats, with elliptical 70x16mm cross-section, in aluminium extrusion, fixed to the top and to the bottom by means of turned details in black nylon and tie rods.

Bridge legs, with elliptical cross-section feet, made in "sandwich" of MDF and steel sheet pressed and glued together.

Slats and feet are always with matt black finish. Floor support secured by black PVC feet.
