design Piero Lissoni

Armchair with supporting frame in tubular steel coated with black epoxy powder.

Seat chassis in solid beech wood, with cross-woven, coated rubber elastic straps and covering in 100% polyether thermally bonded onto a polyamide velveteen backing.

Seat cushion in prewashed and sterilized goose down, stitched into separate compartments, with a differentiated density polyurethane foam insert.

Backrest and armrest frames made with a structural elastic material with fiberglass and steel supports.

Thanks to its flexibility feature, allows a slight bending of the backrest and armrests to provide maximum comfort.

Backrest cushion in polyurethane foam covered with acrylic fiber layers, secured to buttons at sight in the rear of the backrest, through Scooby profiles.

Feet in steel tube Ø25mm chromed-plated finish or with bronzed epoxy powder coating with swiveling tip in PVC.

Covering available in fabric, leather or felt, fully removable by zippers and Velcro fastenings.
